## DECLARING DEATH OF SOVIET UNION, RUSSIA AND 2 REPUBLICS FORM NEW COMMONWEALTH

### Frantic Moves Came to Light In Days Before Maxwell Died

As the Empire Was Crumbling  
A special report.

By STEVEN PROKESCH  
Special to The New York Times

LONDON, Dec. 8 — At the time of his mysterious death on Nov. 5, Robert Maxwell almost certainly knew he was about to be caught.

He had drained hundreds of millions of dollars from his two flagship public companies and from employee pension funds in a frantic attempt to keep his heavily indebted publishing empire afloat.

The auditors of the Maxwell empire, Coopers & Lybrand Deloitte, were to conduct their next regular audit of the pension funds in a couple of months. And Coopers would have quickly dis-

### The New and the Old

### TAKE OVER A-ARMS

Newborn Bureaucracy Is Inheriting Functions of Old Authority

By SERGE SCHMEMANN  
Special to The New York Times

MOSCOW, Dec. 8 — The leaders of Russia, Ukraine and Belarus declared today that the Soviet Union had ceased to exist and proclaimed a new "Commonwealth of Independent States" open to all members of the former union.  
In a series of statements issued after

A remarkable opportunity to better understand the social and economic drivers on rangeland change because it presents a homogeneity of culture and ecology (high elevation grasslands sharing the distinctive Altai biota) intersected by a striking geopolitical differences

By ALAN RIDING  
Special to The New York Times  
MAASTRICHT, the Netherlands

the accounting firm's corporate finance division.  
That discovery led the main holding companies of the Maxwell empire to

MOSCOW, Dec. 8 — Ever since the August coup d'état, the Soviet Union

Gorbachev's vanishing  
Make His Eclipse Clear

happened. This is a fact they can confirm with their daily lives, as they go to factories that have run out of materi-

if he did, whether the military or other levers of power would support him.  
The three cofounders of the new commonwealth — President Boris Y.

Changes after the 1991 USSR Collapse:

China's Altai Mountain area grazing systems remain similar to those in Mongolia, Kazakhstan and Russia during the Soviet era: carefully planned, heavily subsidized and intensive.

This is in stark contrast to Russia's and Kazakhstan's livestock industries, which have dwindled, and Mongolia's, which have both greatly expanded in response to global markets for cashmere and changed in herd composition.

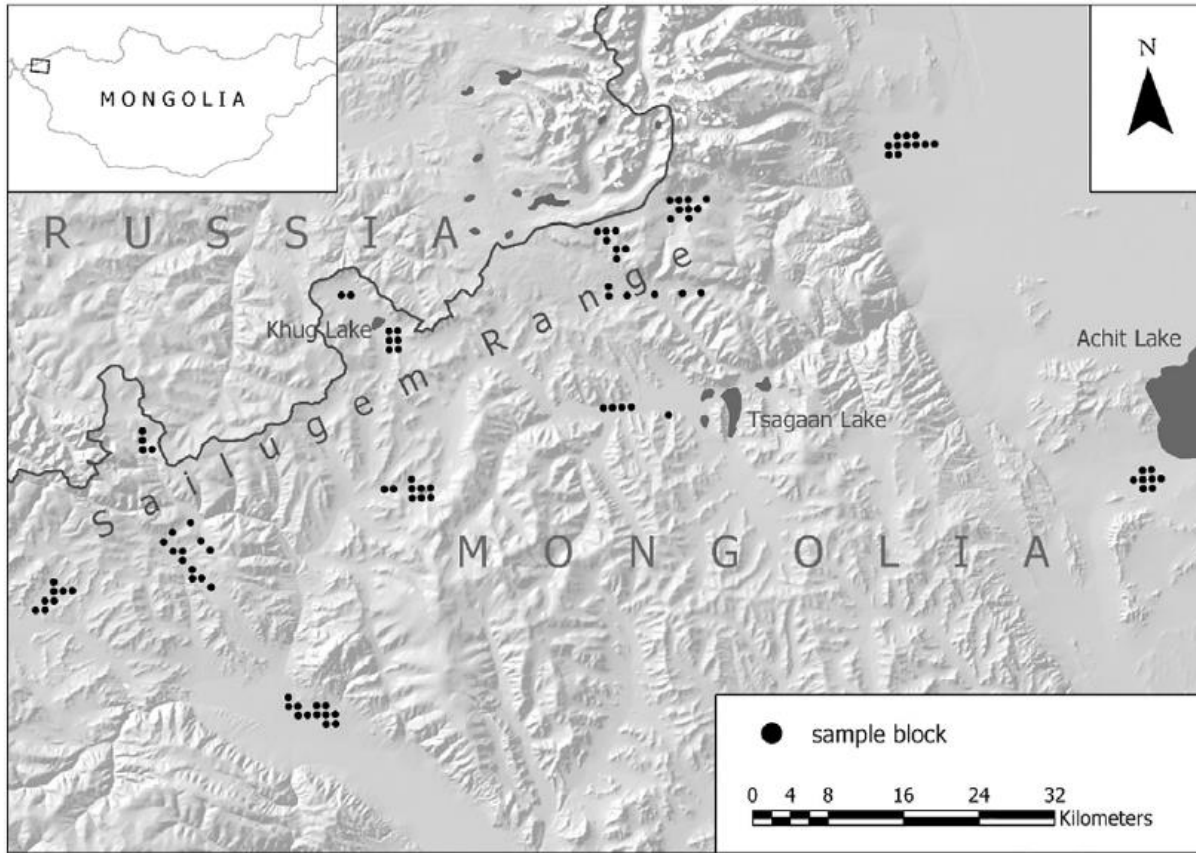

Examine land-cover change consequences of the collapse of top-down government approaches to managing grazing resources of mountain regions.

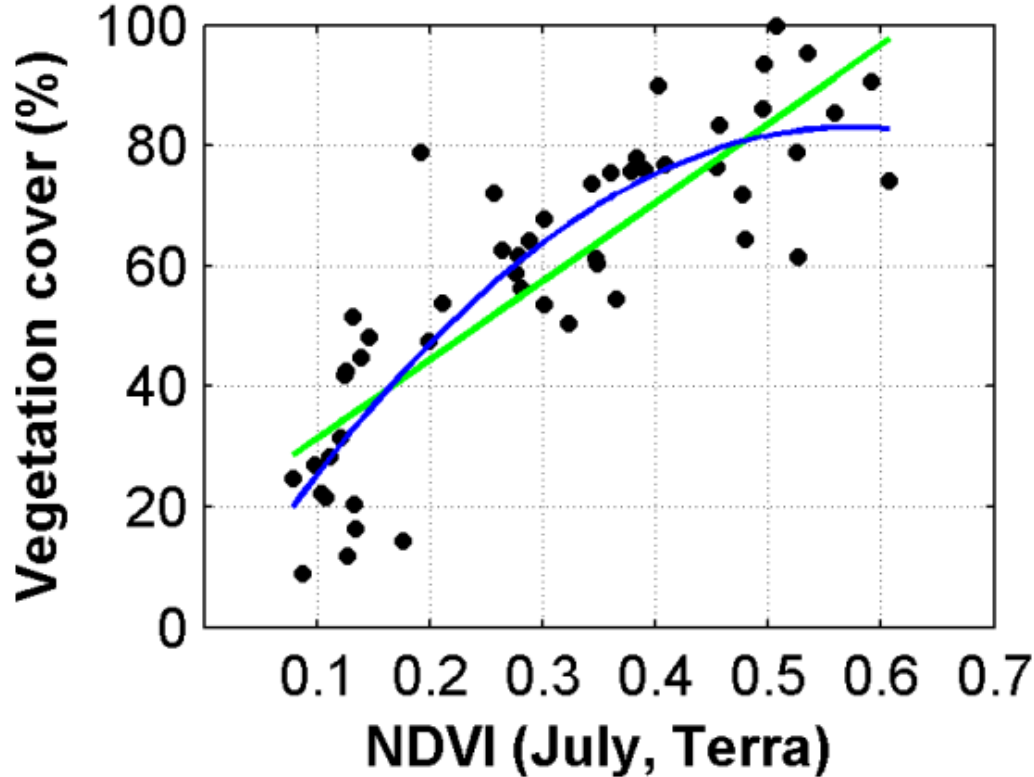

Q1: How accurately do **satellite data** capture vegetation cover in grasslands?

# Ground Validation of NDVI-Vegetation Relationship

## % Vegetation cover vs NDVI

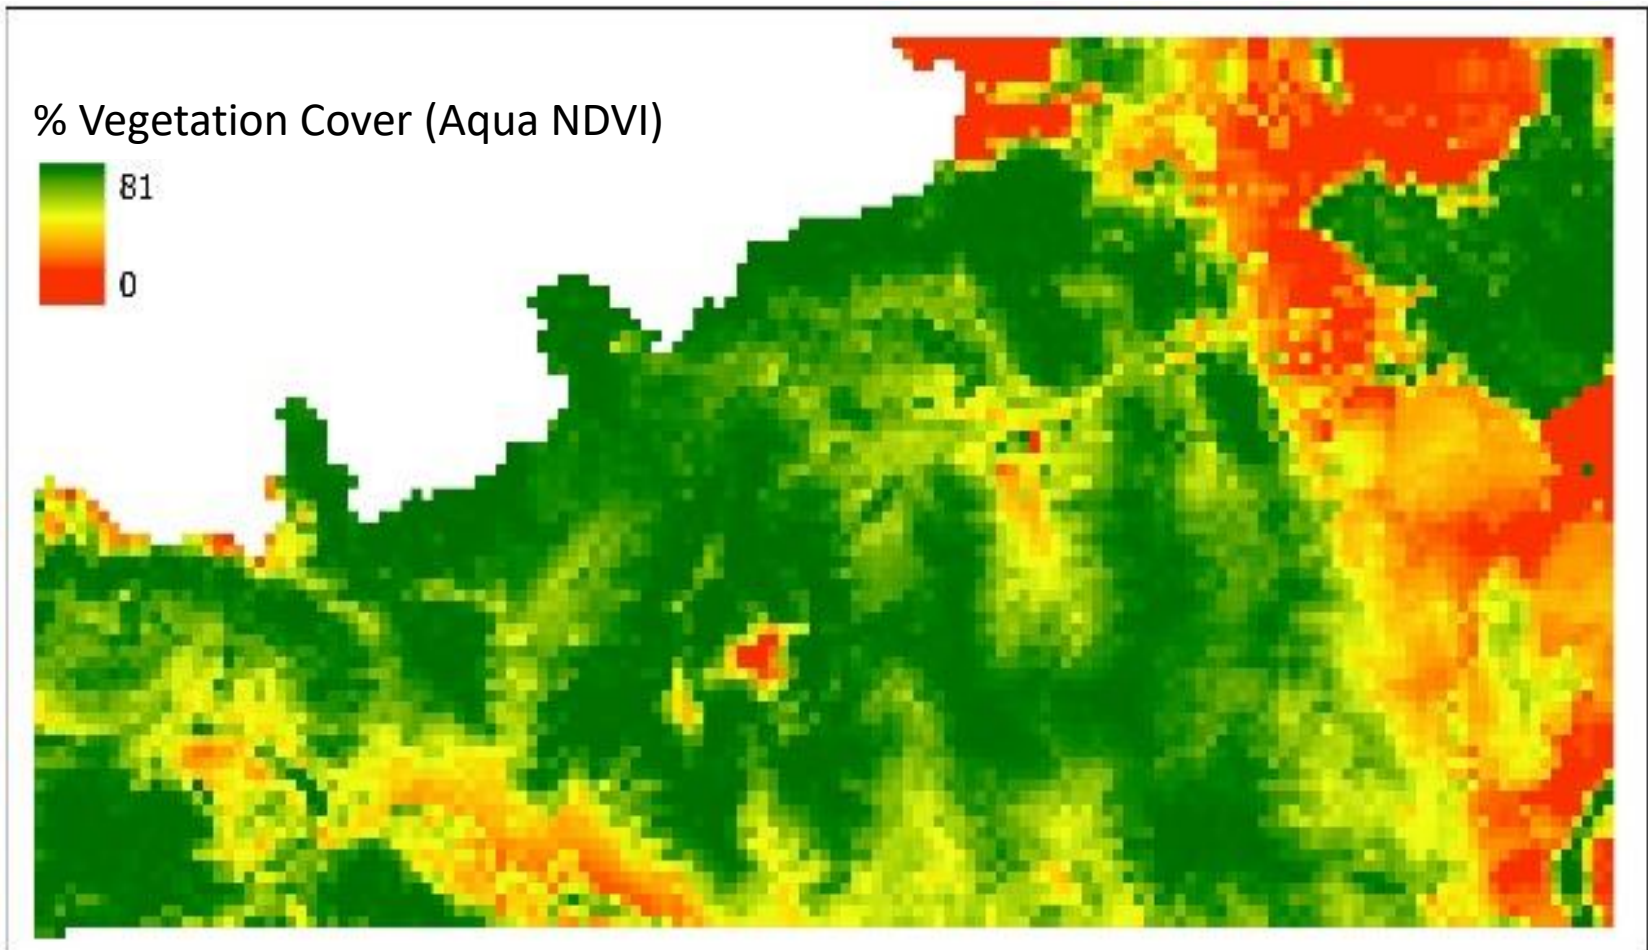

Observe

Both Aqua and Terra VIs for May were highly predictive of July vegetation cover ( $R^2 = 0.80 - 0.84$ )

Predict

We can now:

- Estimate current vegetation on ground using satellite data
- Map rangeland conditions efficiently across entire region
- Predict conditions 1-2 months ahead

Q1: How accurately do satellite data capture vegetation cover in grasslands?

Q2: Do promising new RS classification methods (Deep Learners) offer substantial advantages?

Deep Learners have demonstrated significant advances in multiple fields. What is their added value for RS tasks?
